LED Junction Lights

“Although spotlights are great for highlighting various features in a home, they are also good for providing ample and attractive illumination for an entire room.

Junction Lights or Spot Lights can be used for various purposes: task lighting, where they serve to illuminate a desk or working surface; mood lighting, where they serve to highlight certain focal features in a room, such as artwork, plants or other architectural features; and of course, general lighting, where they can be used to provide overall lighting to any space.”

MAK

Accessories

“Electric fitting must be safe and ensure proper safety to the occupants of the house. Low quality products or appliances can cause fatal accidents like short circuit fire/smoke, break out of fire in entire house, current-shock to any member etc. The materials used should be flame-retardant plastic and metal materials. MAK uses High Temperature Resistant and Anti-aging, Safe and secure electric accessories with higher reliability and lower power requirement.. They are suitable for houses, commercial places, offices, etc. Quality is our leading force and our corporate policy's key aspect. The three terms that characterize the spectrum of electrical products obtained are quality, durability and reliability.”
